

Fluid Components International (FCI) Opens China Subsidiary

Beijing, China; San Marcos, CA, USA—[Fluid Components International \(FCI\)](#) announces the opening of its Beijing, China, subsidiary, [FCI Measurement and Control Technology \(Beijing\) Co., Ltd.](#) FCI is a global manufacturer of gas flow meters, gas and liquid flow switches and liquid level switches, for application in industrial processes and plants, and temperature, flow and level sensor

engineered for on-board aircraft applications.

“This new operation provides localized, full-service capability to all of FCI’s customers in China” said Dan McQueen, President of FCI. “Our goal is to offer world class service and product support to our growing installed base in China.”

FCI’s new company in China provides immediate access to FCI engineering and technical support, repair and re-calibration services, field service personnel and site dispatching, spare parts and training. In addition to employing local Chinese staff highly experienced in process instrumentation, measurement and control, the facility also houses an expanding number of certified precision flow stands for calibration services.

“Our new subsidiary will provide enhanced flow instrumentation capabilities and the highest level of customer care to our customers in China. Our team is well trained and offers expertise in a wide range of application engineering and service support for diverse industries,” said Lisha Zhao, General Manager.

FCI’s award winning products are requested by name in many of the world’s most demanding environments for flow, level and temperature instrumentation. The company manufactures standard off-the-shelf and custom-engineered instruments, sensors and assemblies. Its products are recognized for their accuracy, repeatability and reliability in harsh operating conditions. They are easy to install, require virtually no maintenance, offer long-life and low life-cycle costs.

-More-

With their precision thermal dispersion technology and rugged packaging, FCI's instruments are installed in thousands of applications worldwide. They are certified to meet many of the world's most demanding performance, reliability and quality standards, including: NEPSI, CPA, IECEx, ATEX, FM, FMC, CSA, GOST/RTN, CRN, CE Mark, ISO9001, AS9100, NQA-1, QAL1, SIL-2, 3A Sanitary and more. Industries served include oil/gas, chemical refining, electric power generation including nuclear and coal-fired production, municipal and industrial wastewater treatment, as well as aircraft manufacturers.
