

Quality Policy

At Fluid Components International LLC, we strive to be the preferred global provider of precision measurement solutions that improve efficiency, safety, and sustainability for all our customers.

We will achieve this through commitment to our core values of ingenuity, empowerment, accountability, adaptability, and speed. This will be supported by our Quality Management System which forms the foundation of our operations and decision-making processes allowing us to:

Promote Employee Engagement

Developing a total employee experience where each employee understands the significance of quality and how they have a direct impact on our products and total customer satisfaction.

Customer Focus

Produce a quality product that continually meets and exceeds the parties of interests' expectations, applicable requirements and delivers it on time.

Continual Improvement

Establish lean process, utilize tools to measure, monitor, establish, KPI's that aid in driving the business forward to achieve its goals and quality objectives to continually improve the effectiveness of quality management system.

Embrace Innovation

Continually seeking new methods and opportunities to design, develop and advance creative, timely, effective, and ethical solutions for our operations and customers.

Safety Culture

Recognizing that human factors play a critical role in workplace safety, we foster an open and supportive safety culture where employees are encouraged to speak up about safety concerns. FCI learns from incidents and continuously improves workplace safety practices. We believe that a workforce is well-informed, and the foundation of a healthy and successful safety culture shall not be compromised by other company priorities.
